TRTW5 Specifications

Timberline Tracer-Lock System for Remote Operation

Technology developed by Gas Technology Institute, NFP

Tracer-Lock TRTW5

Specifications:

Length:	56.0 in	(142.24 cm)
Width:	2.5 in	(6.35 cm)
Weight:	7.0 lb	(10.5 kg)

Consists of a long-handled tracer wire connector tool and patented tracer wire connector (each sold separately).

Provides a permanent, reliable, electrical connection between the connected tracer wires.

Installs in a single step.

Lightweight, one-person operation.

Operates in a keyhole.

Connector installs without stripping of the tracer wire.

Tracer wire connector is environmentally protected.

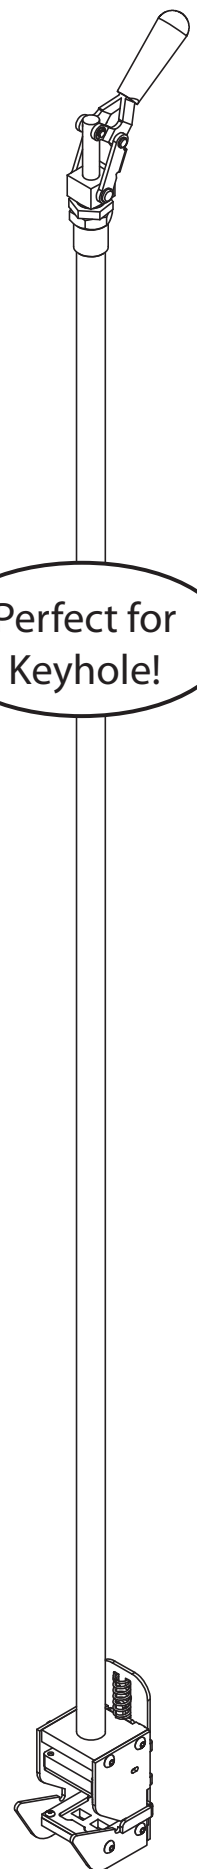

Works on 12 gauge 30 mil and 45 mil coated wire and 14 gauge 30 mil coated wire.

Tracer wires lock in place and will not pull out.

Precision, stainless steel application tool.

Dielectric grease ensures corrosion resistance.

Perfect for
Keyhole!
